TAYLOR MADE SYSTEMS INTRODUCES THE EDGE WINDSHIELD SYSTEM

GLOVERSVILLE, N.Y. – Oct. 2, 2012 – At IBEX 2012, Taylor Made Systems will introduce an upgraded and enhanced version of its Edge Windshield System.

“The Edge was designed specifically with the tow boat and extreme sport boat markets in mind,” said Mike Oathout, vice president of sales and marketing for Taylor Made Systems. “For those consumers, it’s all about styling. And what Taylor Made has done is to take windshield styling to a new dimension, while maintain the standards of quality and finish that we’ve been know for throughout our 100-plus year history.”

The Edge’s exclusive corner design integrates with Taylor’s CrosCurve™, ClearCurve™ or any other TMS designed glass shape. The corner parts are cast as aluminum or stainless steel and designed to meet individual boat builders’ specifications for unique and individual styling. And for designers that wish to take styling even further, the Eclipse frameless bottom attachment system can be integrated with the Edge design for the consummate cutting-edge appearance.

“In such a competitive market, we want to offer boatbuilders as many options as possible to stand out from the crowd and garner the attention of the industry and consumers alike,” said Oathout. “The Edge System offers a nearly endless variety of options, making the boat designers imagination the only limit.”

About Taylor Made Systems

A member of Taylor Made Group, LLC, Taylor Made Systems (www.taylormadesystems.com) is based in Gloversville, N.Y. Together with its partner

companies, Trend Marine Products Limited and Water Bonnet, Taylor Made Systems is the world's largest manufacturer of marine glazing systems and the acknowledged leader in framed-glass windshield technology for powerboats. Other marine product lines include manual and power-actuated doors, roofs, window systems, skylights and hatches. The company also supplies glass products for a variety of agricultural, construction, mass transit and emergency vehicle applications.
